NEW ERA CONSTRUCTORS (PVT.) LTD., KARACHI

MANAGER PLANNING AND PROCUREMENT | OCTOBER 2022 – JULY 2023

Major Responsibilities includes:

- Oversees project planning, ensuring that timelines, budgets, and resource allocation align with client requirements and company capabilities. Coordinate with various departments to establish project objectives and milestones.

- Developing a procurement strategy is pivotal. Determines what materials, equipment, and services are needed for projects, while also considering cost-effectiveness, quality, and supplier reliability. Establish relationships with vendors and negotiate contracts to secure the best terms for the company.
- Responsible for budget management within the planning and procurement department. They monitor expenditures, identify cost-saving opportunities, and ensure that spending remains within allocated budgets without compromising project quality or timelines..
- Identifying potential risks related to procurement, such as supply chain disruptions or price fluctuations, falls under the manager's purview. They develop risk mitigation strategies to minimize the impact of these factors on project delivery, including having backup suppliers or implementing contingency plans.
- Leading a team of planners and procurement specialists, provides guidance, support, and mentorship to ensure their professional growth and productivity. Foster a collaborative and efficient work environment, encouraging teamwork and knowledge sharing among team members.

SACHAL ENGINEERING WORKS (PVT.) LTD., KARACHI
CIVIL / PLANNING ENGINEER | MARCH 2017 – OCTOBER 2022

Major Responsibilities includes:

- Collaborate with architects and other engineers to plan and design civil infrastructure projects such as roads, bridges, and drainage systems, ensuring compliance with regulatory standards and client requirements.
- Prepare accurate cost estimates and budgets for projects, considering materials, labor, equipment, and other resources required for construction, and monitor expenditures throughout the project lifecycle.
- Coordinate procurement activities, including sourcing materials and equipment, negotiating contracts with suppliers, and managing inventory to ensure timely availability of resources for construction projects.
- Oversee construction activities on-site, ensuring adherence to project specifications, safety regulations, and quality standards, and resolving any technical issues or conflicts that may arise during the construction process.
- Implement quality assurance measures to ensure that construction work meets industry standards and client expectations, conducting inspections, tests, and audits as necessary to identify and rectify defects or deficiencies.
- Serve as the primary point of contact for clients, providing regular updates on project progress, addressing any concerns or requests they may have, and ensuring clear and effective communication between all stakeholders involved in the project.
