Munich, Germany • (+49) 174 543 3239 • muneebarshad@hotmail.com • linkedin.com/in/muneebarshadr

Results-driven Civil Engineering graduate with 1.5 years of project engineering experience, pursuing a Master's in Civil Engineering. Specialized in Building Information Modeling (BIM) and Digital Construction. Proven ability to manage complex projects and enhance efficiency. Seeking a working student role to leverage technical expertise and support thesis research in civil engineering.

PROFESSIONAL EXPERIENCE

Planungsburo - 3S, Holzkirchen, Bavaria • Working Student 10/2023 – 02/2024

- Successfully identified and resolved issues in fire water and drinking water systems, enhancing system efficiency and reliability.
- Developed effective fire protection concepts for buildings through precise calculations, ensuring safety and compliance.
- Advanced professional skills by completing training in fire protection methodologies, safety standards, and software tools, contributing to improved project outcomes.

Petrochemical Engineering Consultants, Karachi, Pakistan • Project Engineer 12/2021 - 04/2023

- Pioneered a universal format for technical report writing, enhancing process efficiency by 60%.
- Modeled, analyzed, and designed complex structural projects, ensuring compliance with engineering standards and regulations, achieving a 95% accuracy rate.
- Collaborated with internal and external teams to ensure adherence to on-site compliance parameters, resulting in a 25% improvement in compliance rates.
- Developed detailed plot plans and equipment layouts, optimizing spatial utilization.
- Directed civil and structural steel drafters in generating precise drawings aligned with design specifications, reducing errors by 35%.

EDUCATION

Master's in Civil Engineering • Technical University of Munich, Germany 04/2023 - Present

Relevant coursework: Computational Modeling and Simulation (Majors), Energy Efficient and Sustainable Design and Building, Real Estate Development, and Principles of Simulation.

Bachelor's in Civil Engineering • NEDUET Karachi, Pakistan 08/2017 – 08/2021

Relevant Coursework: Principles of construction management, Quantity surveying, Structural analysis, Mechanics of solids, statics, and dynamics.

SKILLS

- **Technical Skills:** BIM, Quantity Surveying, Real Estate economics, Life Cycle assessment.
- **Soft Skills:** Revit, AutoCAD, Solibri, Nova AVA, Rhinoceros 3D, Grasshopper, Python, C++, Microsoft Office Suite, Power BI, Primavera P6.
