

Resume

Mubashar Bashir

Lahore, Punjab, Pakistan

00923006012998

mubbashas@gmail.com

Objective:

As a civil engineer, I possess extensive experience in successfully executing civil engineering projects with a focus on quality implementation, technical document control, and data management in the construction industry. I am enthusiastic about embracing fresh challenges that allow me to apply my skills and knowledge to further enhance future projects.

Bachelor of Law (LLB)

Baha-ud-din zikriya university, Multan, Pakistan in 2017.

Bachelor of Technology (HONS) in Civil Engineering

PIMSAT, Lahore, Punjab, Pakistan in 2010.

Diploma of Associate Engineering in Civil

Government Polytechnic Institute, Sargodha, Punjab, Pakistan in 1999.

Skills: Auto CAD, Primavera, MS Office.

Civil Engineering:

As an accomplished civil engineer, I excel in designing and executing diverse civil engineering projects, encompassing site development, infrastructure, and structural systems. My expertise in construction materials, techniques and methods is fundamental to ensuring compliance with building codes and regulations. Utilizing engineering software such as AutoCAD and Primavera enhances the precision of my work.

Quality Implementation:

Skilled in implementing quality control measures to ensure adherence to project specifications and standards. Experienced in conducting quality audits, inspections and tests on construction sites. Familiarity with quality management systems and their application in construction projects. Ability to identify and resolve quality issues, ensuring the timely completion of deliverables.

Technical Document Control:

Proficient in managing and controlling technical documents, including drawings, specifications and project documentation. Skilled in organizing and maintaining a comprehensive document control system. Strong attention to detail in reviewing and verifying the accuracy and completeness of technical documents. Experience in coordinating document revisions and ensuring proper distribution to relevant project stakeholders.

Data Management:

Proficient in collecting, organizing and analyzing project data to support decision-making processes. Skilled in using data management tools and software, such as Microsoft Excel and project management software. Experience in generating reports and presentations to communicate project data effectively. Strong understanding of data privacy and security regulations.

Work Experience:

Civil Engineer/Quantity Surveyor

Zamakka Homes, Lahore, Pakistan from 01 Dec 2023 to date.

- Managed and executed various civil engineering projects, including residential and commercial building construction and site development.
- Monitored quality control procedures to ensure compliance with project specifications and standards.
- Conducted regular site inspections to assess work progress and safety compliance.
- Coordinated technical document revisions and distribution for accurate and timely updates.
- Utilized project data analysis to identify areas for improvement and present recommendations to stakeholders.
- Assisted in the procurement process, evaluating bids and recommending subcontractors and suppliers.
- Conducted detailed quantity take-offs and measurements from architectural and engineering drawings.
- Prepared comprehensive bills of quantities (BOQ) for tendering purposes.
- Collaborated with architects, engineers, and contractors for accurate cost forecasting.
- Evaluated contractor claims, variations, and change orders for cost and time impact.
- Participated in contract negotiations and provided valuable cost advice for decision-making.
- Assisted in the procurement process, evaluating bids and recommending subcontractors and suppliers.
- Maintained a comprehensive cost database for future reference and benchmarking.
- Prepared cost reports, forecasts, and cash flow projections for project management and client review.

Civil Engineer

Adam Builders, Sargodha, Pakistan from 01 Nov 2010 to 30 Nov 2023.

- Managed and executed various civil engineering projects, including residential and commercial building construction and site development.
- Monitored quality control procedures to ensure compliance with project specifications and standards.
- Conducted regular site inspections to assess work progress and safety compliance.
- Coordinated technical document revisions and distribution for accurate and timely updates.
- Utilized project data analysis to identify areas for improvement and present recommendations to stakeholders.
- Assisted in the procurement process, evaluating bids and recommending subcontractors and suppliers.
- Conducted detailed quantity take-offs and measurements from architectural and engineering drawings.

Quantity Surveyor

Saudi Oger, Riyadh, Saudi Arabia from 07 Oct 2006 to 17 Oct 2010

Worked on Prince Sultan bin Abdul Aziz palace in Dammam

- Ensured adherence to project budgets and cost targets through precise cost estimation, budgeting, and financial control.
- Conducted detailed quantity take-offs and measurements from architectural and engineering drawings.
- Prepared comprehensive bills of quantities (BOQ) for tendering purposes.
- Collaborated with architects, engineers, and contractors for accurate cost forecasting.
- Evaluated contractor claims, variations, and change orders for cost and time impact.
- Participated in contract negotiations and provided valuable cost advice for decision-making.
- Assisted in the procurement process, evaluating bids and recommending subcontractors and suppliers.
- Maintained a comprehensive cost database for future reference and benchmarking.
- Prepared cost reports, forecasts, and cash flow projections for project management and client review.

Junior engineer cum Quantity surveyor

Selecto Associates from 01 Dec 1999 to 30 Sep 2006

- Assisted senior engineers in designing and analyzing structural systems for commercial buildings.
- Conducted field surveys and collected data to support project design and planning.
- Prepared technical documents, including drawings, specifications, and cost estimates.
- Supported quality control inspections and tests to ensure compliance with project requirements.
- Contributed to project coordination and scheduling through active participation in project meetings.
- Conducted detailed quantity take-offs and measurements from architectural and engineering drawings.
- Prepared comprehensive bills of quantities (BOQ) for tendering purposes.
- Assisted in the procurement process, evaluating bids and recommending subcontractors and suppliers.
