WORK EXPERIENCE

QUANTITY SURVEYOR

RIZHLE Construction & Development Corporation

08/2023 - Present

Catbalogan City, Philippines

Construction company with expertise in structural design, architectural site development, mechanical, electrical, and sanitary needs.

Job Responsibilities

- Responsible for estimating the costs involved in construction projects. This involves analyzing project specifications and drawings to determine the quantities of materials, labor, and equipment needed.
- Monitoring project costs throughout the construction process, identifying and addressing any deviations from the budget.
- Involved in the procurement of materials and services for construction projects. This includes obtaining quotes from suppliers, negotiating contracts, and ensuring that materials meet quality standards.
- Responsible for the final settlement of accounts at the completion of construction projects. This involves reconciling actual costs against the budget, assessing any variations, and ensuring that all parties are paid appropriately.

QA/QC

RIZHLE Construction & Development Corporation

03/2023 - 08/2023

Catbalogan City, Philippines

Achievements/Tasks

- Create and implement quality control procedures and protocols to ensure that products meet established standards and specifications.
- Conducting inspections and tests of materials, processes, and products to ensure compliance with quality standards. This may involve visual inspections, measurements, and testing using various tools and equipment.
- Maintaining detailed records of quality inspections, test results, and other relevant data. They prepare reports documenting non-conformities and recommend corrective actions.

QUALITY ASSURANCE INSPECTOR

RMD BUILDERS

11/2022 - 03/2023

Catbalogan City, Philippines

Job Responsibilities

- Conduct thorough inspections of products or services to ensure they meet predetermined quality standards and specifications.
- Implement and maintain quality control procedures to identify defects, deviations, or non-conformances in products or services.
- Communicate with suppliers, vendors, and internal teams to address quality concerns, provide feedback, and ensure continuous improvement.
- Perform various tests and evaluations, such as visual inspections, measurements, functional tests, and material testing, to assess product/service quality.

ORGANIZATIONS

TAU GAMMA PHI (2015)

Appointed as one of the Chapter President of TAU GAMMA PHI in Samar State University. At the time I was the President, I'm able to learn and accomplish many things. I learned how to manage different people in this brotherhood by interacting with them and knowing their personalities. It's a bit of a challenge for me but at the same time it's an opportunity that I handled these people that leads me to where I am now. For me this was a good exposure for me to prepare and to improve myself in my field of profession.
