Summary

Highly motivated and detail-oriented Civil Engineer seeking a job position to apply academic knowledge and gain practical experience in the field. Committed to contributing to the development and execution of innovative and sustainable engineering solutions. Possesses a strong foundation in structural analysis, project management, and construction practices. Aiming to leverage excellent analytical and problem-solving skills to collaborate with industry professionals and make a positive impact on infrastructure development projects. Aspire to gain hands-on experience in a dynamic and challenging environment to further enhance technical proficiency and professional growth.

Education

NATIONAL UNIVERSITY OF TECHNOLOGY

Islamabad, Pakistan

Bachelor of Civil Engineering

2019-2023

Punjab Group of College

Mirpur, AJK

FSC Pre-Engineering

2017-2019

Professional Experience

Seven Star & Co. Ltd

Mirpur, AJK

Civil Engineer: October 2023 – Present

- **Estimation Engineer:** Worked and assisted in spearheading comprehensive quantity takeoff processes for construction projects, ensuring precise measurements and an accurate Bill of Materials (BOM). Utilize advanced software tools, such as PlanSwift and MS Excel, to streamline quantity takeoff workflows and enhance efficiency.

Star Engineering & Constructions Company Ltd

Mirpur, AJK

Internee: August 2023 – September 2023

- **Civil Engineer:** Worked and assisted in project planning, coordinating activities in civil, architectural, and structural engineering, adhering to industry standards and regulations.

Academic Experiences

Optimizing the Mechanical Performance of Eco-Friendly High Strength Concrete and Unburnt Bricks using Bagasse Ash

NUTECH University

My team made a project to optimize the mechanical performance of eco-friendly high strength concrete and unburnt bricks using bagasse ash as a final year project.

November 2022 – July 2023

- **Engineer:** Developed and made sustainable construction practices, my team embarked on a groundbreaking project aimed at developing eco-friendly high strength concrete and unburnt bricks by incorporating bagasse ash. Through meticulous research, we investigated the profound impact of bagasse ash on the mechanical properties of both high strength concrete and unburnt bricks. Our mission was to revolutionize the construction industry with eco-conscious solutions that not only enhance structural integrity but also promote environmental preservation.

Project Planning of a Building (G+4)

NUTECH University

I did the project planning of a Residential and Commercial Building (G+4).

April 2023 – July 2020

- **Engineer:** Prepared the detailed Work Breakdown Structure (WBS), sequenced the activities and created the relationships. Did the Critical Path Method (CPM) Scheduling, Productivity Rates and Resource Estimation. Created and Analyzed resource and stacked histograms.

Auto Curer for Automatic Curing of Bricks and Structural Members

NUTECH University

My team made a project of an auto curer for the automatic curing of bricks and structural members. We completed this project in 1 month at the ICAT Program.

January 2020 – February 2020

- **Engineer:** Developed and made The Auto Curer project aims to revolutionize the traditional method of curing bricks and structural members by introducing an automated and efficient solution.

Energy Conservation in Dam using Solar Energy

NUTECH University

My team made a project of an energy conservation in dam using solar energy. We completed this project in 1 month at the ICAT Program.

April 2022 – May 2022

- **Engineer:** Developed and created a project of Energy Conservation in Dam using Solar Energy aims to harness the power of renewable energy sources, specifically solar energy, to optimize energy consumption, conserve water and promote sustainability in dam operations.

Extracurricular & Volunteer Experiences

Jammu Kashmir Student Organization

NUTECH University

Vice President: 2022 - 2023

- My primary role was to protect and promote Kashmiri culture and traditions within the university community. I am dedicated to creating an inclusive and supportive environment for students from Kashmir, ensuring that they feel connected to their roots while pursuing their academic goals.
- One of my key responsibilities was to organize cultural events, seminars, and workshops that showcase the rich heritage of Kashmir.

NUTECH Crowdsourcing Learning Community

NUTECH University

Volunteer Member: 2022 - 2023

- Contributing and helping Google to create AI modules that understands different languages and cultures.

NUTECH Literary and Debating Society

NUTECH University

Communication Lead: 2022 - 2023

- It is my pleasure to take you on an extraordinary journey, encapsulating the essence of community experience. As the Communication Lead, I ensure that the club's achievements and activities reach a wider audience.

Certificate

- BIM fundamentals for Engineers (National Taiwan University, 2023)
- BIM applications for Engineers (National Taiwan University, 2024)
- Civil Engineering Job Simulation (John Holland Australia, 2023)

Honor

Energy Conservation in Dam using Solar Energy

NUTECH University

- Received Second Position in Civil Department in the ICAT Program. (2022)

Additional

- **Technical Skills:** PlanSwift, Revit, AutoCAD, SketchUp, Primavera P6, QGIS, Microsoft 365
- **Soft Skills:** Leadership, Teamwork, Communication, Problem Solving, and Management
- **Interests:** Technologies, Football, Adventure, Nature, Cryptocurrency, Cricket, History
- **Language:** English, Urdu
