WORK EXPERIENCE

Civil engineer

NESPAK [01/08/2022 – 26/08/2022]

City: Lahore | Country: Pakistan

As a site engineer intern for road construction, my responsibilities included overseeing the day-to-day construction activities to ensure they adhered to project specifications and safety standards. I assisted in coordinating with contractors and suppliers to ensure timely delivery of materials and resources. Additionally, I supported the senior engineers in conducting site inspections and preparing progress reports.

EDUCATION AND TRAINING

Civil Engineer

National University of Science and Technology [19/10/2020 – 31/05/2024]

City: Islamabad | Country: Pakistan | Website: <https://nust.edu.pk/> | Final grade: 3.58

DIGITAL SKILLS

BIM / Microsoft Office / AutoCAD / Primavera / MATLAB / Project Management / Cost Estimation

PROJECTS

Cost Estimation Project of a 2-Storey House

- Analyzed architectural and structural drawings to understand design specifications.
- Performed quantity takeoff to calculate required materials and work scope.
- Selected appropriate rates for labor, materials, and equipment based on market research.
- Compiled total cost estimation, including contingencies and overheads, for a comprehensive financial forecast.

Retrofitting of RBC structures

- Write here comparative analysis of RCC and RBC
- Elemental based non-linear analysis in ABAQUS
- Suggesting a retrofitting scheme

Structural and Architectural Designing of a Mosque

- Used AutoCAD for designing
- Calculation and designing of reinforcements

Residential House Expansion Project

- Designed a terrace and additional living space using three RCC columns and a cantilever system, ensuring unobstructed ground floor space.
- Developed detailed construction drawings and hand calculations, validated by finite element software, adhering to ACI 318 guidelines and using local materials.
