

Muhammad Mouaz CIVIL ENGINEER (PEC REGISTERED) 493-P Block Sabzazar, Lahore, Pakistan (+92) 347-4546724 mouazabbas827@gmail.com PEC Reg # Civil/59568	
ABOUT Skilled and dedicated civil engineer having experience in building construction, quantity & cost estimation, interior finishing, document management, and preparing B.O.Q according to ASCE & ACI building codes. I am passionate about learning new technologies and have a good understanding of engineering concepts and good communication skills. EXPERIENCE The Home Makers, Lahore — Quantity Surveyor July 2023 – up to the current date • This company makes residential homes, so I must calculate the initial cost of the project. • Prepare B.O.Qs and Priced Bills. • Visits site 2 times a week and checks the on-site measurement of work and then makes labor bills accordingly. • Most of the time PLAN-SWIFT software I use which makes my estimate more accurate and less time-consuming. • Check site store inventory and note the remaining materials. • Prepare Bar bending schedule of steel. • Making contracts with sub-contractors • Checking site bills most of the time sent by site engineers and then going to the site and ensuring the bill is according to the site.	SKILLS Primavera P6 Plan swift Microsoft Office Material Testing Use of Total Station Use of Theodolite Use of Auto level Contract Management Project Management TECHNICAL COURSES 1. Iosh. 2. OSHA. 3. AMKRE Construction Company, Lahore — Quantity Surveyor

DEC 2021 - JUNE 2023

- Assisted senior engineers in designing and analysing structural components for commercial and residential projects.
- Conducted site visits and inspections, documenting project progress and ensuring compliance with design specifications and safety regulations.
- Collaborated with multidisciplinary teams, including architects and contractors, to ensure seamless project coordination.
- Utilized AutoCAD and other software tools to create detailed engineering drawings and models.
- Assisted in preparing project proposals, cost estimates, and project schedules.

JK BUILDERS, Lahore — Quantity Surveyor

JUNE 2020 - OCT 2021

- My duties as a civil engineer were to control the cost and manage the
- Payments to the running contractors. Support in tendering activities.
- Source various competent contractors. Measure works on site and from drawings.
- Review and validate payment variation orders and claims of contractors and consultants.

PROJECTS

Zero Energy Design Building - Final Year Project

Global warming and the energy crisis have been the greatest problems which are rising rapidly. We need to cut our primary energy demands and promote the use of renewable energy resources in order to ensure sustainable development. For buildings Zero energy design is the optimum solution to this problem. It encompasses the Triple Bottom Line (TBL) framework. For this research, we will be considering some already existing buildings in Lahore as a reference for our modelling. Building Energy Modelling (BEM) will be conducted based on the building energy loads and annual energy consumption of the building.
