Career Objective

To work for an organization that provides plentiful experience and knowledge which can boost up my technical and interpersonal skills, career as a professional and a steady-paced professional growth.

Summary of Experience

Result oriented and self-motivated professional with over **6 years of experience** in managing strategic and high-profile projects within the construction industry of **Pakistan & USA**. Verifiable track record for the successful completion of high value projects through strong interpersonal and communication skills while managing large scale projects. Backed by strong credentials and proven history of successful project completions within schedule and budgetary constraints meeting international quality standards.

Formerly I worked with a well reputed USA based construction firm in Lahore, Pakistan as an **Estimation & Quantity Engineer (QS)**. I used to provide quantity estimates & QS Services to private & Government contractors of USA, Canada & Australia. In my tenure with this firm, I have completed quantity estimation of more than **300 different projects**. These projects are related to almost every field of construction (Residential Buildings, Infrastructure & Commercial Buildings).

I also have experience of working with private contractor as a **Cost Control Engineer & QS Coordinator**. I used to handle documentation and work sheets submitted by sub-contractors and vendors. Making sure to add those documents in monthly invoices and making complete annual record book. Cumulative sum of previous months and comparison graphs with that of work remaining. Using Power BI to make dashboards to present budget and expenditures, also handling all the activities on site and reporting those activities to my manager. I also used to make Bill of quantities with help of consultant engineers. Dealing with client and consultant on site and making RFIs (request for information) on behalf of my firm was also a part of my responsibilities. I used to handle the site staff and related procurement activities. In addition to this I have done few paid & unpaid internship trainings during my course work with companies such as Pak Civil Creations & NESPAK Consultant.
