PROFILE

As an MEP Assistant Manager at AESOM, I supervise mechanical, electrical, and plumbing projects, utilizing Planswift software and blueprint reading for precise takeoffs and resource management. I lead a team of leads and collaborate with division leads to ensure high standards of project execution and stakeholder satisfaction. I have a strong foundation in electrical as well as mechanical & plumbing estimation and design. I have successfully completed multiple residential, commercial, industrial, and process plant projects in the USA, UK, and Canada, delivering comprehensive quantity assessments that streamline project planning and budgeting. I am passionate about driving excellence in construction across various domains and delivering value to clients and stakeholders.

EDUCATION

Bachelor of Commerce Oct 2016 – Nov 2018
University of the Punjab, Lahore
As an MEP Estimator with a Bachelor of Commerce degree, I bring a unique blend of financial acumen and technical expertise to project estimation. My role involves precise evaluation of mechanical, electrical, and plumbing systems, ensuring accurate cost assessments and resource allocation. My strong analytical skills, combined with a solid understanding of commercial principles, enable me to deliver comprehensive estimates that support effective project planning and budgeting.

EMPLOYMENT

Assistant Manager of MEP Department Jan 2024 – Present
AESOM, Lahore
As an MEP Assistant Manager, I aid in formulating detailed cost estimates for mechanical, electrical, and plumbing systems in construction projects. My tasks include scrutinizing project

specifications and designs, performing material takeoffs, and working alongside senior managers and project teams. I maintain precise records of estimates and project data, review estimates, resolve queries, and contribute to the estimation process, ensuring accuracy and efficiency in project planning and execution.

MEP Lead

Sep 2023 – Jan 2024

AESOM, Lahore

As an MEP Lead, I oversee the execution of mechanical, electrical, and plumbing systems within projects. My role involves coordinating with various teams to ensure seamless integration and adherence to project schedules and budgets. I provide technical guidance, manage resources, and resolve issues to ensure high-quality, on-time delivery of MEP systems. Additionally, I maintain clear communication with stakeholders to address any concerns and ensure project objectives are met effectively.

Electrical Team Lead (Quantity Surveyor)

Mar 2023 – Aug 2023

AESOM, Lahore

As an Electrical Lead, I oversee electrical system installations, ensuring seamless integration with project teams. I manage schedules and budgets, provide technical guidance, and address issues to ensure compliance with specifications and safety standards. Effective communication with stakeholders ensures successful project outcomes and timely resolution of concerns.

Senior Electrical Estimator (Quantity Surveyor)

Oct 2022 – Feb 2023

AESOM, Lahore

I boost team productivity by implementing process improvements and sharing innovative ideas. I lead training for new hires, ensuring their effective integration. My role involves enhancing estimate accuracy and optimizing project outcomes through experienced oversight and strategic guidance.

Junior Electrical Estimator

Jun 2022 – Sep 2022

AESOM, Lahore

As a junior electrical estimator, I reviewed technical documents, including schedules and project specifications, for commercial and residential projects. Under the guidance of senior estimators, I used PlanSwift software to perform takeoffs, including fixture counts and wiring. I compiled and sorted data in Excel, finalizing a complete BOQ.
