

UBAIDULLAH

CIVIL ENGINEER | NEBOSH CERTIFIED

PROFESSIONAL SUMMARY

- A highly motivated civil engineer with over 5 years of comprehensive experience in planning, estimation, and site management across residential, commercial, and large-scale infrastructure projects. Proven expertise in project estimation & planning, site engineer, and ensuring full compliance with industry standards and safety regulations. Certified in NEBOSH IGC, OSHAS 30-Hour General Industry, and ISO 14001, with additional qualifications in fire safety, confined spaces, and working at heights. Adept at managing diverse teams, optimizing workflows, and delivering projects on time and within budget

PERSONAL INFORMATION

- Available:** Immediately
- Date of Birth:** 03/28/1997
- Nationality:** Pakistani

CERTIFICATIONS

- NEBOSH International General Certification (IGC)
- OSHA 30 Hours General Industry Standards
- ISO 14001:2015 (EMS) Lead Auditor Course
- Level 2 Award in First Aid at Workplace
- International Level 2 Award in Fire Safety
- Risk Assessment
- Confined Space Entry
- Working At Height

WORK HISTORY

Planning & Estimation Engineer | (06/2022 - Present)

Zara Construction Group | Islamabad, Pakistan

Working on American (USA) projects as a Planning & Estimation Engineer.

Key Responsibilities:

- **Cost Estimation:** Prepare comprehensive cost estimates for labor, materials, and equipment, ensuring accuracy in both preliminary and detailed estimates. Develop itemized bills of quantities (BOQs) and pricing schedules for use in project proposals and cost analysis.
- **Bid Preparation:** Create competitive bid proposals by evaluating project requirements, market conditions, and subcontractor costs. Ensure all bids are fully compliant with client specifications and industry standards.
- **Supplier & Subcontractor Management:** Source and obtain competitive quotes from vendors and subcontractors, carefully reviewing material and service costs to optimize project profitability while maintaining quality.
- **Project Collaboration:** Work closely with project managers and stakeholders to ensure that cost estimations align with project timelines, milestones, and overall budgets. Provide ongoing support throughout the project lifecycle to ensure financial control and efficient resource allocation.
- **Client Communication & Negotiation:** Serve as the primary point of contact for clients regarding cost-related inquiries. Clarify project terms, negotiate contract conditions, and present value-driven proposals to clients to secure project approvals.

Site Engineer | (09/2020 - 05/2022)

Communication & Works Department (Govt of Kpk) Pakistan | Swat kpk, Pakistan

Worked on Construction of Hospital and responsible for various site works including roads, infrastructure, and residential/commercial units.

Key Responsibilities:

- **Project Management & Execution:** Led and managed the construction of a government hospital and various infrastructure projects, including roads, landscaping, and residential units. Ensured all site activities were conducted in strict accordance with project plans, timelines, and quality standards.
- **Infrastructure Development:** Played a key role in the execution of road construction, civil works, and utility installation. Coordinated site development activities to align with project specifications and local government regulations, ensuring compliance and timely completion.
- **Construction Supervision:** Supervised the construction of building structures, including concrete foundations, structural framing, plumbing, and electrical systems, as well as architectural finishes such as tiling, plastering, and painting. Provided hands-on direction to site crews to optimize labor and resource utilization.
- **Coordination & Site Operations:** Managed daily site operations, including material procurement, allocation of resources, and coordination with subcontractors and vendors. Ensured efficient workflow to meet project deadlines and cost objectives.
- **Progress Monitoring & Reporting:** Prepared comprehensive progress reports, detailing site activities, resource consumption, and project milestones. Provided regular updates to senior management, addressing technical issues and proposing solutions to maintain smooth operations.
- **Safety & Regulatory Compliance:** Enforced health, safety, and environmental regulations on-site to ensure a safe working environment. Supervised subcontractor compliance with legal requirements and project specifications, performing site inspections to ensure all work adhered to government and safety standards.
- **Quality Assurance & Control:** Monitored and assessed the quality of materials and workmanship used on-site, taking corrective actions to rectify any deviations from project specifications or industry standards. Implemented quality control measures to ensure the durability and integrity of constructed works.
- **Stakeholder Coordination:** Served as the intermediary among project stakeholders, such as government representatives, contractors, and local community members. Promoted effective communication and collaboration to address issues and achieve project goals.

SKILLS & EXPERTISE

Engineering & Design:

- Proficient in reading and interpreting complex construction drawings, ensuring accurate execution of building and infrastructure works.
- Expertise in design and drafting software, including **AutoCAD** and **SketchUp**, for the development of 2D/3D models, detailed plans, and visualizations to support construction projects.

Planning & Estimation:

- **Cost Estimation & Quantity Take-offs:** Expert in using RSMeans and Planswift to prepare accurate material take-offs and detailed cost estimates, ensuring the timely and cost-effective completion of projects.
- **Bill of Materials (BOM) Preparation:** Competent in preparing comprehensive BOMs, ensuring clarity and accuracy in project material and labor requirements, tailored to both residential and commercial projects.
- **Project Scheduling & Planning:** Proficient in using Primavera P6 for project planning, resource allocation, and timeline optimization to ensure the efficient execution of construction projects.

Site Management:

- **Project Scheduling:** Competent in developing and maintaining project schedules to ensure timely completion of construction projects.
- **Subcontractor Management:** Experienced in coordinating with subcontractors and managing their performance to meet project requirements.
- **Resource Allocation:** Skilled in efficiently allocating resources, including labor, materials, and equipment, to optimize project performance.
- **Safety Protocol Enforcement:** Knowledgeable in enforcing safety protocols and regulations to maintain a safe construction site.

Software Proficiency:

- **AutoCAD:** Advanced proficiency in AutoCAD for technical drawing and design.
- **Civil 3D:** Experienced in using Civil 3D for civil engineering design and drafting.
- **Microsoft Office:**
- **Word:** Skilled in creating and formatting documents.
- **Excel:** Proficient in data analysis, budgeting, and reporting.
- **PowerPoint:** Experienced in creating presentations and project reports.
- **Primavera P6:** Advanced skills in project scheduling and management.

- **RSMeans:** Expertise in utilizing RSMeans for cost estimation.
- **SketchUp:** Proficient in 3D modeling for design visualization.
- **Planswift:** Experienced in quantity take-offs and cost estimation using Planswift.
- **Estimation Software:** Skilled in various estimation software tools for accurate cost and material analysis.

PROJECTS HANDLED

- **Hospital Construction** - Managed on-site activities for the construction of a hospital, overseeing civil works, building systems, and architectural finishes.
- **Residential & Commercial Units** - Supervised construction of multiple residential and commercial projects, ensuring adherence to design specifications and deadlines.
- **Infrastructure & Landscaping Projects** - Worked on soft/hard landscaping, irrigation networks, and road infrastructure

DESIGN PROJECTS

- Final year project stabilization of expansive soil using stone industry waste.
- Detailed architectural planning of residential on AUTOCAD software.
- Cost estimation and scheduling of residential building using PRIMAVERA P6.
- Design of compression and tension members of truss manually.

ACHIEVEMENTS

- **Winner, UOL Sports Gala (Cricket)** - March 2018
- Organizer of UOL Sports Society (2017-2020)

HOBBIES AND INTERESTS

- Hiking
- Cricket
- Reading
- Football
