Profile

Motivated and detail-oriented Civil Engineer with one year of professional experience. Demonstrated expertise in **Site Engineering**, **Project Estimation** with **planswift** and **Bluebeam**, and the creation of **Architectural** and **structural drawings** using **Revit** and **SAP2000**. Proficient in conducting site inspections, ensuring compliance with safety standards, and collaborating with multidisciplinary teams to deliver projects on time and within budget. Adept at problem-solving, analytical thinking, and effective communication, ready to contribute to innovative engineering projects and sustainable solutions.

Education

Peshawar, Pakistan

Bachelor of Civil Engineering

University of Engineering and Technology Peshawar

Major Subjects: Quantity Survey and Cost Estimation, Engineering Drawing (AutoCAD, Revit); Structural Engineering (SAP2000); Irrigation Engineering; Fluid Mechanics; Construction Materials; Geotechnical Engineering; Foundation Engineering; Project Management (MS Office, Primavera).

Dera Ismail Khan,

Professional Experience

2024/03 – present
Rawalpindi, Pakistan

Estimation Engineer

Projects: American Based Projects for Pre-Bidding and Post Bidding.

Company: The Value Engineering

- Successfully prepared accurate and competitive cost estimates for a diverse range of construction projects, including numerous **American-based projects for pre-bidding and post-bidding analysis**.
- Meticulously analyzed project requirements and interpreted Architectural and Structural drawings, ensuring precise understanding and execution for **Concrete, and Site work**.
- Collaborated seamlessly with project managers and engineers to ensure comprehensive and detailed estimations.
- Reviewed project plans and specifications thoroughly to ascertain the scope and necessary materials, maintaining alignment with project goals.
- Conducted thorough site visits to collect pertinent information and verify existing conditions, contributing to the accuracy of project assessments.
- Evaluated quotes from subcontractors and suppliers meticulously to ensure accuracy and competitiveness, essential for project success.
- Utilized a comprehensive suite of software tools including **AutoCAD, Excel, PlanSwift, and Bluebeam** for precise take-offs and calculations, enhancing efficiency and accuracy in estimation processes.

2023/08 – 2023/10
Islamabad, Pakistan

Site Engineer

Project: Livelihood Support and Promotion of Small Community Infrastructure (LACIP)

Company: Pakistan Poverty Alleviation Fund (PPAF)

- Managed construction projects under the "Livelihood Support and Promotion of Small Community Infrastructure (LACIP)" initiative.
- Ensured compliance with project plans, specifications, and quality standards.
- Conducted regular site inspections to monitor progress and identify potential issues.
- Supervised the construction of various infrastructure components, including roads, water supply systems, and community buildings.
- Ensured adherence to safety regulations and environmental standards.
- Liaised with contractors, suppliers, and stakeholders to coordinate project activities and resolve any construction-related issues.
- Prepared progress reports and maintained project documentation.
- Contributed to the success of projects aimed at poverty alleviation and community development by delivering high-quality infrastructure within budget and schedule constraints.

Site Engineer

Project: Upgradation of D I Khan-Zhob N50 Phase 1 (CPEC)

Company: National Logistic Corporation (NLC)

As a Site Engineer for the "Upgradation of D I Khan-Zhob N50 Phase 1 (CPEC)" project under the National Logistic Corporation (NLC), I played a crucial role in overseeing and managing construction activities to ensure the successful completion of the project. My responsibilities included:

Supervising and coordinating construction activities on-site to ensure compliance with project specifications, quality standards, and safety regulations.

Collaborating closely with project managers, engineers, and subcontractors to ensure efficient workflow and timely completion of project milestones.

Conducting regular site inspections to monitor progress, identify potential issues, and implement corrective measures as needed.

Reviewing project plans, drawings, and technical documents to understand project requirements and coordinate with stakeholders accordingly.
