OBJECTIVE

As a motivated Civil Engineer with 1 year of post-graduation and 1.5 years of pre-graduation expertise in construction and project management, I seek a challenging position to further enhance my skills and contribute to innovative projects. I want to use my experience in construction & project management to address today's challenges. At the same time, I aim to keep learning about the newest technologies and best practices in field.

EXPERIENCE

RESIDENTIAL PROJECT

- Managing a construction of 2000 sq. yd. luxury bungalow in DHA, designed by renowned architectural firm NBCL.
- Coordinate with architect, consultant and contractors (waterproofing, Geotech & pool) to streamline project activities.
- Supervise and plan different phases of the construction activities, conduct accurate BBS and quantity takeoffs ensuring adherence to timelines, quality standards and cost management.
- Successfully executed a residential project in DHA designed by renowned architect Studio Sera as Assistant Construction Manager.
- Supervised and planned all phases of the construction process, ensuring adherence to timelines and quality standards.
- Conducted accurate quantity takeoffs to facilitate cost management.

FIT-OUT PROJECT

- Successfully managed a commercial fast-track fit-out project of renowned architect ASA as Assistant Engineer at Dolmen Sky Tower-B.
- Oversaw intricate ID works, MEP installations, fire safety protocols, and access control security systems.
- Produced formal documentation and reports, coordinated effectively with multiple stakeholders to streamline project activities.

COMMERCIAL PROJECT

- Actively participated in the construction of a luxury guest house in jurisdiction of MDA.
- Provided diligent site supervision to maintain project progress and quality standards.
- Generated bar-bending schedules and conducted detailed quantity takeoffs to support accurate budgeting and resource planning.

SOFTWARES

- Abaqus/CAE
- MS Office
