OBJECTIVE

Electrical Engineering graduate from Mehran UET Jamshoro, with practical experience from internships at JPCL (Thermal Power Plant) and K Solar. Skilled in project execution, leadership, and communication, I am driven to apply my expertise in role where I can create a lasting impact.

EDUCATION

Mehran University of Engineering and Technology, Jamshoro (MUET)

Bachelor of Engineering in Electrical Engineering:

October 2019 – December 2023

- Relevant Course Work: Power Generation System, Power System Analysis, Power Electronics, Introduction to Embedded System, Power System Protection, Electrical Power Transmission, Power Distribution & Utilization, High Voltage Engineering, Linear Control System, Power Economics & Management, Microprocessor System.

Degree College K N Shah

Intermediate (Pre-Engineering):

April 2017 – May 2019

WORK AND EXPERIENCE

GENCO-1 JPCL, Thermal Power Plant, Jamshoro (Intern)

Jamshoro June 2023 – July 2023

- Acquired in-depth technical knowledge of thermal power plant components, including steam turbines, boilers, heat exchangers, generators, and alternators.
- Studied the various sources of energy used in the power plant, such as water, steam, and coal.
- Enhanced skills in identifying and troubleshooting potential faults in the power plant's systems, learning preventive measures and maintenance strategies for ensuring smooth operations and minimal downtime.
- Built familiarity with safety protocols and operational procedures to maintain a safe and compliant working environment, understanding the importance of systematic checks and adherence to safety standards.
- Attained a practical understanding of environmental considerations associated with thermal power plants, including emissions control and strategies to mitigate environmental impacts.
- This experience provided a comprehensive foundation in the operations and management of a thermal power plant, emphasizing hands-on skills in fault detection, maintenance, efficiency analysis, and operational safety.

K Solar (Trainee Engineer)

Karachi May 2024 – Aug 2024

- Gained hands-on experience in solar energy systems, focusing on solar plant design, installation, and efficiency optimization. Enhanced knowledge of solar technology fundamentals and practical applications.
- Developed proficiency in Solar Plant Design using Sketch-Up, creating detailed layouts tailored to individual site requirements. Learned to accurately calculate electrical load from utility bills to ensure the system meets energy needs.
- Acquired comprehensive understanding of the various types of solar power systems, including on-grid, off-grid, and hybrid systems.

- Studied and evaluated different roof types and their suitability for solar panel installation, selecting appropriate mounting solutions and aligning installations for structural stability and optimal energy capture.
- Developed expertise in orienting solar panels to maximize exposure to sunlight. Analyzed potential obstacles and environmental factors affecting solar efficiency, learning to mitigate issues like shading, debris, or structural obstructions to ensure peak performance.
- Acquired insight into efficiency management techniques, focusing on minimizing operational hurdles and optimizing plant performance. This included implementing strategies for reducing energy losses and improving system reliability.

ACADEMIC PROJECT

Design and Development of Wireless Power Transmission System (FYP).

- To develop a simulation model of the system using Multisim Software.
- To do analysis of the performance/results and study the potential of wireless power transmission.

CERTIFICATIONS AND AWARDS

1. Professional Membership:

- IEEE Society MUET, Jamshoro.
- IEEE PES Society MUET, Jamshoro.

2. Renewable Energy & Electrical Certifications:

- MATLAB Onramp (MathWorks Trainings)
- Renewable Energy Technology Fundamentals.
- Renewable Energy and Green Building Entrepreneurship.
- Solar Energy Basics.
- Electrical Power Generation.
- Basics of Electrical Protection System.
- Electric Power System.
- Power System Modelling and Fault Analysis.
- Industrial Applications of Machine learning and Future trends.

3. Project Management & Skills Development:

- Becoming a changemaker: Introduction to Social Innovation.
- High Performance Collaboration: Leadership, Teamwork, and Negotiation.
- Project Management at Forage.
- Critical Thinking Skills for the Professional.

SKILLS & COMPETENCIES

Soft Skills: SKETCHUP, AutoCAD, MATLAB, MULTISIM, MS Office, HelioScope, BOQ, design document, Technical survey, Electrical Protection System, Making/Submitting net metering files.

Interpersonal: Collaborative team player, Analytical and Quantitative skills, Leadership proficiency, Resilient under pressure, communication skills, negotiation skills, problem-solving.

ACTIVITIES

- Member of IEEE Society MUET, Jamshoro.

- Member of IEEE PES Society MUET, Jamshoro.
- Member of MALS Society MUET, Jamshoro.
- Quest Innovative Study Circle (Participant)

Languages: English, Urdu.
