EDUCATION

Bachelor of Civil Engineering National University of Sciences and Technology, NUST CGPA 3.41

10/2020 - 05/2024

Courses

- Construction Project Scheduling
- Construction Contract Management
- E-Commerce
- Design of Concrete Structures
- Shopify
- Amazon

WORK EXPERIENCE

Engineer Intern Defence Housing Authority, DHA Islamabad

08/2022 - 10/2022

Tasks

- Participated in professional development workshops, collaborated with senior engineers on projects, and assisted with site inspections and project documentation
- Enhanced interpersonal skills through frequent interaction with professionals, aiding effective collaboration
- Acquired hands-on engineering experience, refining construction and project management understanding
- Engaged in team discussions, offering insights to optimize project results

Engineer Intern Military Engineering Services (MES) Risalpur

07/2023 - 09/2023

Tasks

- Conduct routine inspections of construction and maintenance projects to ensure quality and compliance with military standards
- Maintaining detailed records of progress, site reports, material usage, and workforce deployment
- Collaborated with senior engineers to identify and resolve structural issues
- Demonstrated dedication to ongoing learning, proactively pursuing growth opportunities in structural engineering

E-commerce Expert Shopify

Tasks

- I have two years of experience in e-commerce, selling products on Shopify by running ads on Facebook, Snapchat, Tiktok and Instagram targeting Pakistani as well as UAE marketplace.

SKILLS

ETABS

AutoCAD

Revit Architecture

Civil 3D

Primavera

PlanSwift

MS Excel

Power point

FINAL YEAR PROJECT

Road Layer Detection and Volume Calculation Using Drones and Artificial Intelligence

- Our final year project team achieve **2nd place** out of 40 groups in the **MCE Rector's Gold Medal Competition**
- Qualified for **FICS Stage 3** and received the **PEC Award**
- Focused on enhancing road construction efficiency using drones and AI for road layer detection and volume calculation
- Integrated with Primavera software to automate S-curve updates, improving project tracking, accuracy, and reducing costs

Cost Estimation

- I have work on the cost and quantity estimation of sub structure foundation its excavation and super structure which contain bricks masonry, columns, beams and slabs. i can also estimate the cost of machinery and labour operating at that particular project.

PERSONAL PROJECTS

Effectively planned and managed projects with Primavera, showcasing adeptness in project management and scheduling

Developed user-friendly web app for efficient Primavera project updates and stakeholder management

Conducted comprehensive 17-day engineering survey in Abbottabad, yielding detailed reports with valuable insights

Utilized Revit for compliant residential building design and structure

Ensured structural integrity and safety through ETABS analysis of multistory building

Design of 3 story building using Revit as a semester project modeling of all the plans and section

Cost and quantity estimation of sub structure foundation its excavation and super structure

Designed a House using AutoCAD as a semester project allocation focusing on floor plans, structural layout and utilizing usefull space.
