“Architectural & Civil Draftsman/3D Modeler”

HIGHLIGHTS

- 5 years of experience as a Draftsman and 3D modeling in and Construction and Architectural environment
- Associate Engineering Diploma in Civil Engineering(Quantity Survey)
- Autodesk’s AutoCAD Certification
- Completed a thesis on the Design and Contract documents of Sewerage Scheme of 250 no of Houses including Estimation and BOQs
- More than 200 Plus 3D models of different Venue i.e. Stadiums, Arenas, Airports, Convention Centers, Buildings, Hospitals, Malls, Casinos and Stores etc are completed across all USA
- Well proven Drafting, Architectural Drawings, Visualisation, communication, and decision making skills, with the ability to learn fast, innovate, and problem solving under pressure

WORK EXPERIENCE

3D Modeler ISB, PK

July 2020-Till Date

DAS Technology Services, HQ Texas, USA

- Create 3D models of indoor spaces, considering the specific requirements for in-building wireless communication systems using **IBwave** Software
- Work closely with network designers and architects to understand project requirements and incorporate them into the 3D model
- Ensure that the 3D models integrate seamlessly with other iBwave design tools and contribute to the overall in-building wireless network design process
- Perform quality checks on 3D models to ensure accuracy, completeness, and adherence to design specifications
- Generate documentation and reports based on the 3D models to communicate design decisions, coverage analysis, and other relevant information
- Address and resolve challenges related to 3D modeling within the iBwave environment, adapting to specific project requirements
- Recommended changes in materials or processes to correct detected problems
- Importing KML and Exporting Models to Google Earth to check their Exact Location, Coordinates and precision
- Provide training and support to other team members on 3D modeling techniques and best practices within the iBwave software
- Stay up-to-date on industry trends and advancements in 3D modeling and in-building wireless communicate

Sr Architectural & Civil Draftsman

Nov 2018- June 2020

Alshaif PVT LTD, ISB, PK

- Use computer-aided drafting (CAD) software programs and equipment or a conventional drafting station to create and modify architectural documents, designs, working drawings, forms, charts and records
- Analyze current building codes, by-laws and requirements to establish how they affect architectural drawings, and stay up-to-date on all required and relevant codes
- Bring together structural, mechanical and electrical designs and create a way or a method of accurately arranging them to produce building designs that are understandable and feasible
- Draw detailed and rough scale plans for structures, foundations and buildings based upon preliminary concepts, sketches, specification sheets, engineering calculations and other provided data
- Design interior room arrangements for commercial buildings using computer-assisted drafting (CAD) equipment and software
- Acquire and assemble information needed to finish architectural drawings, visiting job sites when necessary to gather measurements
- Oversee, organize and inspect the work of draftspersons, technologists, technicians and other relevant team members working on construction projects

EDUCATION

Diploma of Associate Engineering in Civil (Quantity Survey)

2019

Construction Technology Training Institute, Islamabad, PK

Faculty of Science: Pre-Engineering

2016

Govt Degree College, Kharian, PK

PROFESSIONAL TRAINING AND CERTIFICATIONS

Autodesk's AutoCAD Certification

2018

National Training Bureau, Islamabad, PK

PROFESSIONAL SKILLS

AutoCAD, 3D Modeling CAD, Microsoft Office, IBwave wifi, Basic Revit, Google Earth, Estimation, Construction knowledge and BOQs of Materials, Total Station, Auto Level and Staff reading, Drawings Reading skills especially USA

LANGUAGE SKILLS

English, Urdu, Punjabi
