SKILLS

Onscreen Takeoff | Bluebeam REVU | Planswift | Auto CAD | Power BI

Advance Excel | SAP SD & MM | Civil & MEP Estimator

Profile Summary

Experienced Quantity Surveyor with over 5 years in Cost Management across Civil, MEP, and fit-out projects. Skilled in tender analysis, pre-construction quantity take-offs, cost estimation, and BOQ preparation, with proficiency in On Screen Take-off and SAP S4 HANA. Adapted in MEP estimates, vendor negotiation, change orders, and project billing.

Experience

RCS Cost Management Services Pvt Ltd (US Projects)

Assistant Manager QS – MEP

Apr-2023 to Present

- **Led the Management of a 2-Tower G+67, 27 million GSF hotel and commercial project valued at \$1 billion, achieving a 15% cost reduction**—resulting in savings of \$150 million through strategic cost management and optimization.
- **Pre-construction Quantity Take-offs** for Electrical, Mechanical, and Plumbing works across commercial, education, healthcare, residential, and retail sectors, delivering up to 10% accuracy improvement using On Screen Take-off software.
- **Detailed Cost Estimation Based on Engineer/Designer Narratives**, contributing to refined budgets and project scope clarity for stakeholders.
- **Advised Project Managers on cost-effective strategies**, implementing solutions that delivered a cumulative cost efficiency gain of 8-12% throughout various project phases.
- **Prepared Comprehensive Bills of Quantities** that covered materials, labor, and equipment needs with 98% accuracy, minimizing unforeseen costs.
- **Conducted Multi-phase Cost Comparisons** to track project financials, maintaining transparency and achieving a 5% cost improvement by identifying high-value alternatives.
- **Managed MEP Estimates and Change Orders**, implementing procurement strategies that streamlined workflows, enhanced cost tracking, and contributed to a 15% project cost reduction.

Home Interiors Design E-Commerce Pvt Ltd (Singapore Projects)

Quantity Surveyor

June-2022 to March-2023

- **Verifying Interior Design Drawings** to ensure 100% alignment with project specifications and quality standards, reducing costly errors by up to 20%.
- **Preparing BOQs** through streamlined coordination with Design, Procurement, and Finance teams, facilitating up to 15% savings on project estimates.
- **Developing Tender and Contract Documentation** alongside interior design experts, ensuring comprehensive and compliant agreements that safeguard project interests.
- **Conducting Material Verification** for make, shade, color, and design, meticulously aligning with designer and client specifications to maintain aesthetic and functional standards.
- **Prequalifying Vendors** for key materials, securing suitable rates and ensuring value; achieving an average cost optimization of 10% through strategic sourcing.
- **Analyzing and Comparing Supplier Quotations**, identifying optimal options that align with budgetary constraints, project scope, and material quality.
- **Documenting Amendments and Variation Orders** with each scope change, maintaining 100% project accuracy and seamless communication across teams.
- **Negotiating with Suppliers and Stakeholders**, driving favorable terms that increase project margins by an average of 5%.
- **Monitoring Profit and Margin** with real-time tracking and implementing value engineering to drive an additional 10% savings across projects.
- **Tracking Client Payments and Final Billing**, ensuring timely payment alignment with the accounts department, supporting smooth project cash flow.
- **Controlling Costs** through robust planning and effective vendor management, reducing project overheads and enhancing efficiency.
- **Improving Service Quality** by implementing a structured feedback loop with designers and customers, raising satisfaction scores by up to 15%.
- Risk Identification and Mitigation, analyzing potential project risks and developing proactive response strategies to maintain timelines and budgets.
- **Handling Purchase Orders via Canvas** and **Tracking Vendor Payments with Xero**, ensuring full transparency and accountability in financial tracking.
- **Generating Sales Orders** that accurately reflect customer product and service details, promoting clarity and reducing customer inquiries by up to 25%.

This structured approach not only streamlines project workflows but also drives impactful cost savings, risk reduction, and quality enhancements across every stage of the project.

JMC Projects India Ltd

Senior Engineer Billing (QS)

August-2020 to May-2022

Proficient in Quantity Take-off and BOQ Analysis, I ensure seamless project cost management and resource allocation through meticulous study and preparation of construction drawings, BOQs, and budgets in SAP S4 HANA. My expertise includes:

- **Accurate Quantity Take-off and Budget Preparation** for diverse project components, from initial BOQ analysis to detailed budget uploads, achieving up to 98% accuracy.
- **Managed a B2+G+26 floor residential/commercial project valued at ₹55 Crore**, demonstrating expertise in cost management, quantity take-offs, and contract administration to ensure project delivery within budget and timeline constraints.
- **Comprehensive Report and Contract Preparation**, including budgets, risk assessments, and strategic advice to clients and managers on cost optimization.
- **Material Tracking and Requirements Forecasting** to prevent shortages, maintaining smooth project flow and reducing procurement lead time by 20%.
- **Expert in estimating finishing items** such as flooring, granite cladding, and marble works, with a strong focus on assessing design wastage and effectively negotiating wastage percentages with clients to optimize project costs.
- **Scope and Design Change Documentation**, minimizing project risks by identifying impacts early, recording adjustments, and updating relevant project records.
- **Stakeholder Relationship Management**, fostering trust and collaboration with vendors, clients, and teams, and securing competitive pricing through negotiation, yielding up to 10% cost savings.
- **Subcontractor Billing**, ensuring accurate invoices, cost tracking, and timely payments to maintain project budget alignment and financial transparency.
- **Vendor Billing and SAP Integration**, managing Purchase Requisitions, Purchase Orders, Sales Orders, and bill uploads efficiently to ensure accurate financial tracking.
- **Design Wastage Analysis and Material Reconciliation** for key resources like tiles, cement, and steel, aligning physical quantities with SAP records to ensure budget compliance.
- **Progress Reporting and Rate Analysis** for non-tendered items, qualifying vendors and updating SAP with BOQ amendments and WBS code generation as required.
- **Overhead Planning and Asset Verification**, providing month-wise tracking of project expenses, resource allocation, and asset utilization for efficient cost control and reporting.

These capabilities allow me to drive project accuracy, financial transparency, and stakeholder alignment, ensuring project goals are met on time and within budget.

Ultra-Tech Cement Limited (Contract to hire)

Quality Control Engineer / Application Engineer

January-2018 to November-2018

With extensive expertise in material testing and quality assurance, I ensure compliance, accuracy, and efficiency in project material management by:

- **Conducting Rigorous Material Testing** for particle size distribution, water content, and absorption, ensuring adherence to IS Standards and verifying material integrity before deployment.
- **Managing Precise Quantity Takeoff** from client drawings, achieving over 95% accuracy for optimal resource planning and cost control.
- **Coordinating Material Requirements with Clients**, preparing monthly and weekly forecasts to meet project timelines and prevent shortages.
- **Testing Cement and Admixtures** for various parameters, including Tail Mix Tests, to ensure consistency and performance in alignment with client specifications.
- **Monitoring Concrete Quality** by controlling slump, strength, and other quality metrics, delivering results that meet or exceed client standards.
- **Reconciling Raw Materials** for transparent usage tracking and minimizing waste, aligning on-site records with planned quantities.
- **Performing Instrument Calibration Checks** to uphold testing accuracy and maintain compliance with quality standards.
- **Maintaining Detailed Reports and Documentation**, ensuring transparent, organized records that support project quality assurance and traceability.

This rigorous approach ensures material quality, enhances client satisfaction, and maintains compliance across all stages of project execution.
