OVERVIEW

Engineer with a Master in Hydro science and Engineering and bachelor's in urban engineering. Competent in hydraulic modeling, climate change analysis, industrial construction and groundwater management. Experienced in advanced modeling software and basic programming skills. Proven project management and researcher with strong teamwork skills. Passionate about water modelling, sustainable construction and environmental engineering.

SOFTWARE LITERACY

Modelling/Design Software's: QGIS, ArcGIS, ModelMuse, PCSWMM, EPASWMM, HECRAS, GMS, WEAP, AutoCAD, BASEMENT, panoply, SDSM.

Project Planning/Scheduling/Documentation: MS Project, Primavera, MS Office.

EDUCATION

Qualifying Engineers for Germany in Water, Environmental and Civil Engineering

Magdeburg-Stendal University of Applied Sciences..... (Oct. 2024 - ongoing)

- Civil engineering (infrastructure, construction and roadworks), water management, economics, law for engineers.
- Environmental protection, sustainability, health and safety in Germany.
- Time management, project management, rhetoric and presentation skills

M.Sc. Hydro Science and Engineering (CGPA: 2.0)

Technische Universität Dresden (Oct. 2020 – Sep. 2023)

- Urban water management, groundwater modeling and water supply systems
- Climate change, climatology and climate modeling, environment and hydrology
- Hydraulic engineering, flood risk management, integrated water resource management

Master's Study Project: "Application and evaluation of an automated sub-catchment generator for the Storm Water Management Model (SWMM)" (Sept. 2021 - Feb. 2022)

Master's Thesis "Heat transport modeling for managed groundwater recharge systems for industrial water supply on the Elbe" (Jan. 2023-Juli 2023)

B.Sc. Urban Engineering (CGPA: 1.6)

NED-University (Dec. 2013 – Sep. 2017)

- Construction management, costs and economics
- Civil engineering, fluid mechanics, traffic systems
- Geology, Geodesy
- Urban sociology and planning

Bachelor's Thesis: "Hydraulic modeling of the K-IV Karachi water supply system"

EXPERIENCE

Artistic Milliners

Civil Engineer..... (July 2020 – Nov. 2020)

- Construction of industrial treatment and processing plants
- Carrying out quality checks on materials
- Supervising, planning and organizing all construction activities
- Construction of water supply lines and drainage networks
- Billing and payment processing
- Checking and approving bending plans
- Inspection reports, construction site documents and drawing evaluation

Yunus Textile Mills

Executive Engineer..... (Feb 2018 – June. 2020)

- Construction of industrial buildings, power plants, underground utility tunnels
- Laying of drainage networks, water supply pipes, culverts, sidewalks, roads.
- Supervision, planning, design and management of construction work for machine foundations and maintenance work
- Inspecting and inspecting construction sites, defining the scope of work, drawing up specifications, assessing the quality of work and invoices
- Creating measurement sheets, negotiating and finalizing offers and awarding projects
- Creation of bar bending plans, reinforcement planning and steel quantity calculation

Internship; Karachi Water & Sewerage Board (Jan. 2017 – Sep. 2017)

- Reports, presentations and planning of activities
- Review of runoff calculations

Internship; Paragon Constructions (Mai 2016 - Juli 2016)

- Site supervision of the construction and sealing work
- Completion Presentation and submission of the report

LANGUAGES

English, Urdu, German (Intermediate), Hindi (Speaking, Listening)

VOLUNTARY COMMITMENTS..... (Jan. 2015- Dec. 2024)

- Volunteer/Career Counselor (TCF)
- Student Coordinator for Hydro Science & Engineering, TU Dresden
- Member of the Pakistani Student Association, Dresden
- Analysis and Modeling of Traffic Safety (Workshop)
- Short course HVAC of building services, design process and design considerations
