Shahpur Kanjra Multan Road
Lahore.

Education

- **UET Lahore**
BSC Electrical Engineering
Completed in 2024 with 3.189 CGPA
- **Govt. College of Science**
FSC Pre-Engineering
Completed in 2020 with 82% Marks.

Skills

- Microsoft Office (Word, Power point, Excel)
- MATLAB
- Power World Simulator (PWS)
- PS PICE, FEMM
- MULTISIM for circuit designing
- JMAG designer
- Basic languages (C, python, data structures)
- Planswift for Estimation

Certificate

Aug 31-2024 | TS design LESCO
Paid Internship Certificate with 60k stipend

Objective

I am a self driven, focused and self motivated electrical engineer with a clear vision to make my world better place in all areas of life. As an electrical engineer, I strive to apply my knowledge across various power sectors, including generation, transmission, and distribution, to enhance system reliability and efficiency. Demonstrates a commitment to integrating theory with practical skills for effective problem-solving in professional contexts.

Work Experience

- July 2024- Present
IPS | AL-Hafeez Executive plaza Gulberg Lahore
Electrical Estimation Engineer
This is an USA based company and I have the skills to analyze the drawings of pre-construction buildings of USA. My job is to accurately measuring and listing all the electrical materials needed, such as wiring, fixtures, circuit breakers, and panels.
- July 2024 - Aug 2024
LESCO | Chief Engineer TS Design Paragon City Lahore
Internee
I did a paid internship where I have learned about:
 - Vetting/Approval of Technical data.
 - Vetting of Tender documents.
 - Vetting of Transmission lines and Grid station profile.
 - witnessing of FAT's (Inspection of T&G and Distribution system materials).
- July 2023 - Aug 2023
PEL | 14km, Ferozepur Road Lahore
Internee
In this Industry I have learned about:
 - Hands-on experience in the design, manufacturing, and testing of transformers and switchgear, deepening your knowledge of power distribution equipment.
 - Also gain the knowledge of the testing of oil used in transformers.
- June 2022 - Aug 2022
LESCO | 132KV Grid Station Garden Town Lahore
Internee
In 2022, I did an internship at a 132kv grid station, where I learned about:
 - Practical knowledge of high-voltage equipment like transformers, breakers, and relays.
 - Understanding of safety protocols and operational standards specific to Pakistan's power grid.
 - Experience with load management and balancing to ensure efficient power distribution.
