

# Fayzan Zafar

Civil & Petroleum Engineer

## Contact:

✉ fayzi.zafar@gmail.com

☎ +61 469 720 490

📍 4 Gay Avenue, Gilles Plains,  
5086

## Key technical skills:

- Civil Engineering design  
(CAD via Qikdraw,  
Blubeam Revu, Trimble  
Connect)
- Production scheduling,  
Documenting (struM.I.S,  
MS Office, Aconex, MS  
Excel VBA)
- Geostatistical estimation  
and simulation  
(GeostatsWin)
- Budget Forecasting & Cost  
Tracking, Finance  
(Workbench, Avaloq,  
CHAMP)

## Career objective

Highly motivated Engineer seeking an opportunity in the Civil Engineering industry to utilise developed technical skills in real-world, community changing projects.

Passionate about understanding the workings of structural engineering and Urban/Rural development projects, and solving key issues such as developing sustainable infrastructure, reinforcing existing structures and site productivity enhancement.

## Education:

BEng (Civil & Structural and Petroleum) (Honours)  
The University of Adelaide, Aug 2014 – Mar 2020.

3 CaRST Hours in Domain C (Improving Financial Literacy)  
The University of Adelaide, July 2017.

BEng (Civil & Structural & Petroleum) (International Study Tour)  
Bandung Institute of Technology, July 2016

## Detailed Professional Experience:

September 2022 – May 2024

**チャウドリトレーディング株式会社**

Position: Site Manager and Engineer

- Administrative responsibilities pertaining to business development, digitalisation, increasing international sales, implementing marketing strategies, supply-chain management.
- Increased Exports by \$370,000 (800% YoY increase)
- Site management of Ship breaking/ship recycling operations.
- Engineering new processes to increase efficiency of operations, whilst ensuring compliance with HKC. Ensured maintenance of an Inventory of hazardous materials.
- Developed SWMS and JSA's for ship recycling specific activities on site through extensive research and literature surveys.
- Provided technical support analysis to Project Managers and subcontractors e.g. Crane Lift studies, loading sequencing, resourcing, staff hiring etc.

January 2021 – April 2022

**Self Employed**

Position: Civil Project Manager and Site Engineer.

- Reviewed plans and specifications during schematic design of residential houses in prime housing schemes: DHA and Bahria Town, Lahore during the pre-construction phase.
- Conducted weekly contractor meetings which facilitated stronger communication and enabled timely resolution of critical issues faced on site(s).
- Conducted daily site inspections and visits to supervise construction activities and provide technical expertise to the subcontractors and various suppliers during the construction phase.
- Utilised project management tools e.g. WBS, Gantt Charts to efficiently schedule and track progress of both the Grey Structure and Finishing works of project.
- Oversaw entire building process from obtaining building permits from jurisdictional authority's till the finished house.

July 2020 - January 2021

**Consolidated Technologies Pty Ltd.**

Position: Graduate Project Engineer

Worked closely with the Director on R&D projects primarily focusing on Renewable Energy, Desalination, Rural water distribution systems

Additionally, assisted in the successful completion of assignments, submission of technical reports, concept and pre-feasibility studies on hydro projects pertaining to the mining sector in Australia.

October 2019 – June 2020

**SA Structural**

Position: Graduate Civil Project and Site Engineer

Planned, coordinated, executed, and closed out 3 commercial projects, namely: The Adelaide Oval Hotel, Westminster Senior School and Uniting SA West Lakes (\$10 million combined). Responsibilities included the following:

- Providing timely and efficient support at all stages of the project including formulation of project drawings, specifications, subcontract documents, progress tracking.
- Identifying project risks and preparing risk management plans, risk registers, SWMS, JSA.
- Using production control systems to monitor, plan and track shop drawings, procurement, processing, fabrication, finishing, corrosion protection, erection and resource status.
- Providing technical support analysis to Senior Project Managers e.g. Lift studies, erection sequencing, resourcing etc.
- Assisting to identify opportunities for value addition and cost effectiveness.
- Conducting progressive visits to suppliers, subcontractors and Site supervision.
- Adhering to and enforcing safety procedures in line with Australian Steel standards and regulations.

Jan 2019 – Oct 2019

**BT Financial Group, Westpac**

Position: Asset Transfer Specialist

- Preparing documents for, and liaising with; Share Registries, Fund Managers and ASX Counter parties.
- Primary contact point for advisers, support staff and clients during the Asset transfer process.
- Working with internal stakeholders (Tax and Accounting, Product, Distribution etc.) and external service providers to resolve issues.
- Providing insights into current themes and trends in the work.
- Working closely with colleagues across multiple teams, products and service centres.
- End to end processing of client assets/wealth from BT Wrap, BT Margin lending, Asgard and various External platforms (e.g. Macquarie Wrap, Colonial First state etc.) to BT Panorama.

Mar 2017 – Nov 2017

**Santos Ltd.**

Position: Undergraduate Petroleum Engineer

- Project Manager of a project which combined elements of Petroleum engineering, Data analytics and Machine learning.
- Carried out the Descriptive and Predictive data modelling for both the Fracturing and Perforation data-bases for Oil and Gas wells in the Cooper Basin, Australia.
- Performed additional Predictive data modelling through writing programming scripts in MATLAB compiler and SPSS Modeller.
- Ensured that all deliverables were met in a timely and efficient manner by tracking progress via Gantt charts, meeting minutes and weekly reporting to supervisors.

Sep 2009 – 2020

**Private**

Position: Tutor

Provided academic assistance (volunteering and paid) to students from grade 5 to International Baccalaureate in Mathematics, Physics, Chemistry and English. The method I employed for engaging and teaching students consistently lead to better learning and improved academic results.
