 - Understanding of EHS protocols and SOPs.
-

WORK HISTORY

Industrial Enterprises Pvt. limited

Technical Field Engineer, Lahore

(08/2024 - Present)

- Analysis and review the architectural drawings, specification and BOQs to ensure contract compliance
- Manage site and office task simultaneously related to EIFS (External Insulation Finishing system)
- Coordination between site and office team so that execution is to be as per approved drawings and designs
- Ensure quality of work at site and inspection of contractor work as per standards
- Check the bill of contractor as per site measurements

- Manage, estimate and verify quantity of delivered materials at site
- Assist in procurement, documentation and material demand planning
- Check and insure health & safety standards during execution
- Pre-Locate problems at site and coordination with client about problems, solve the issues to avoid disturbance of execution
- Prepare RFI, DPR, Checklist, check inspection and concerned documentation to make record for projects.

ProCon. Design and Construction

Civil Project Engineer, Lahore

(07/2023 - Present)

- Collaborate with architects, designers and stakeholders to develop project plans and specifications.
- Assist in project planning, scheduling, and coordination of projects.
- Conduct feasibility studies and site investigations to assess potential challenges.
- Estimate project costs, prepare budgets, and monitor expenditures to ensure projects remain within budgetary constraints.
- Supervise construction activities to ensure adherence to design specifications, drawing and quality standards.
- Implement corrective actions and resolutions to address issues identified during inspections.
- Allocate resources effectively and efficiently to meet project timelines and objectives.
- Implement and enforce safety protocols and procedures to maintain a safe working environment for all personnel on-site.
- Identify potential risks and develop risk mitigation strategies to minimize project disruption.
- Serve as the primary point of contact for clients, consultants, contractors, and regulatory authorities. Address client inquiries, concerns, and requests promptly and professionally.

SAM Associates Engineers & Contractors

Site Engineer, Lahore

(09/2022 - 06/2023)

- Develop detailed project plans, schedules, and budgets.
- Coordinate with architects, engineers, and clients to define project requirements.
- Ensure compliance with building codes, regulations, and safety standards.
- Manage and allocate resources, including labor, materials, and equipment.
- Ensure the efficient use of materials to minimize waste and control costs.
- Monitor construction work to ensure it meets design specifications and quality standards.
- Enforce safety protocols and regulations to prevent accidents and injuries.
- Conduct regular site inspections and risk assessments.
- Prepare cost estimates and monitor expenditures to keep projects within budget.
- Approve invoices, process payments, and negotiate contracts with vendors.
- Identify cost-saving opportunities without compromising quality.
- Act as the primary point of contact between clients, contractors, and regulatory authorities.

- Report progress to stakeholders, addressing any issues or delays.
- Resolve disputes and handle any unexpected challenges on-site.
- Develop project timelines and adjust schedules as needed.
- Use project management tools (e.g., Primavera, MS Project) to track progress.
- Ensure timely completion of each phase to avoid project delays.
- Maintain accurate project records, including contracts, permits, and change orders.
- Prepare regular progress reports and documentation for stakeholders.
- Ensure legal and contractual obligations are met.
- Identify potential risks and develop mitigation strategies.
- Address on-site challenges, such as weather delays or material shortages.

ESSIAR Consultant

Site Engineer, DG Khan

(12/2021 - 09/2022)

- Conduct inspections of construction sites to monitor work progress and quality of workmanship.
- Ensure that construction activities comply with project specifications, approved drawings, and applicable codes and standards.
- Identify and report deviations, defects, or non-compliance issues to the project manager or relevant stakeholders.
- Verify the use of approved materials, methods and equipment.
- Maintain detailed and accurate records of site inspections, observations, and test results.
- Prepare daily, weekly, and monthly reports summarizing site activities, progress, issues, and resolutions.
- Apply knowledge of civil engineering principles, construction methods, and materials to assess work quality and compliance.
- Interpret drawings, specifications, and technical documents to verify and completeness of construction activities.
- Provide technical guidance and assistance to resolve construction-related issues and challenges.
- Document any changes, modifications, or variations to the original plans or specifications.
