Professional Summary

Motivated and detail-oriented Civil Engineer with a strong foundation in structural analysis, construction management, and geotechnical engineering. Proficient in industry-standard software including AutoCAD, ETABS, SAFE 21, ANSYS Fluent, and MS Excel. Passionate about applying engineering knowledge to real-world projects, problem-solving, and sustainable infrastructure development. A proactive team player with excellent analytical and communication skills, seeking an entry-level role to grow technical expertise and contribute to innovative projects.

Education

BSc Civil Engineering – University of Engineering and Technology, Taxila (2025)

FSc (Pre-Engineering) – Bahria College, Islamabad (2020)

Matriculation (Science) – Bahria College, Karachi (2018)

Professional Experience

Intern – ESA Consultants (2024)

- Assisted in site inspections, surveying, and project documentation.
- Gained experience in structural analysis, quantity estimation, and construction supervision.
- Used AutoCAD and ETABS for drafting and structural analysis.
- Collaborated with senior engineers in project planning and execution.
- Learned construction materials testing, quality control, and safety protocols.

Intern – Frontier Works Organization (FWO) (2025)

- Assisted in site supervision and quality control during construction of the GPO Underpass.
- Conducted quantity estimation and material checks.

- Learned project scheduling, structural works, and safety procedures under senior engineers.

Academic Project

Final Year Project – Investigation of Water Flow in an Open Channel with Rigid Vegetation

- Analyzed the impact of rigid vegetation on flow resistance, velocity distribution, and hydraulic behavior.
- Conducted laboratory experiments and applied hydraulic principles to flood management applications.
- Evaluated environmental engineering implications for sustainable water management.

Skills

Technical Skills

- Structural Analysis & Design (Load calculations, material strength basics)
- Hydraulics & Fluid Mechanics (Open channels, drainage systems)
- Surveying & Leveling (Total station, leveling techniques)
- Construction Materials & Methods (Concrete, steel, asphalt, soil mechanics)
- Geotechnical Engineering (Soil testing, foundations basics)
- Quantity Estimation & Costing (BOQ preparation, material estimation)
- Environmental Engineering (Water treatment, sustainability practices)
- Software: AutoCAD, ETABS, SAFE 21, ANSYS Fluent, MS Excel, Primavera

Soft Skills

- Problem-Solving & Critical Thinking
- Teamwork & Collaboration
- Time Management & Organization
- Communication Skills
- Adaptability & Willingness to Learn
