+92-324-8582416 ◇ Karachi, Pakistan

Detail-oriented Civil Engineering graduate with a strong foundation in structural and BIM design, quantity surveying, cost estimation, and project planning. Proficient in tools like AutoCAD, Revit, ETABS, Civil 3D, with practical experience across site execution, BOQs, and digital construction workflows.

EDUCATION

Bachelor of Civil Engineering, NED University of Engineering and Technology (3.62/4.00) 2021 – 2025
Karachi, Pakistan

FSC Pre Engineering, Cadet College Razmak (1014/1100) 2019 – 2021
Razmak NWTD, Pakistan

SKILLS

Technical Skills	AutoCAD, Revit, MS Excel, ETABS, Civil 3D, ArcGIS, Navisworks
Planning Tools	MS Project, Primavera P6 (basic)
Estimation Tools	BOQ Preparation, Rate Analysis, Quantity Takeoff
Other Skills	Site Execution, Drafting, Drawing Interpretation, Progress Monitoring

WORK EXPERIENCE

Site Internee Mar 2024 – Apr 2024
Paragon Constructors Pvt. Ltd. *Karachi, Pakistan*

- Prepared quantity takeoffs for concrete and steel; assisted procurement and estimation team.
- Reviewed structural drawings, checked reinforcement, and monitored site execution.
- Participated in concrete sampling/testing and daily progress documentation.

Site Internee Mar 2025 – Apr 2025
Kings Group *Karachi, Pakistan*

- Estimated BOQ quantities; supported layout and reinforcement inspection.
- Recorded progress, handled measurement sheets, and observed contractor billing processes.
- Developed strong coordination skills with site teams and consultants.

ACADEMIC PROJECTS

BIM Model of G+1 Residential Building. Developed architectural, structural, and MEP BIM model using Revit. Produced walkthroughs, schedules, and sheets for coordination and planning.

Steel Roof Extension Design. Designed a lightweight steel roof using ETABS with C-section trusses and purlins. Performed connection design, load checks, and deflection analysis.

G+3 Residential Cost Estimation. Created BOQ and performed quantity takeoff and rate analysis for concrete, steel, and finishes using Excel.

Construction Planning and Scheduling. Developed project bar chart in MS Project with resource and milestone tracking for G+3 building.

Road Design and Alignment. Planned road curves and gradient manually and in Civil 3D; included slope and alignment optimization.

Architectural Drawings Walkthrough. Prepared interior and exterior drawings of a G+1 house using AutoCAD and Revit with rendered views.

Concrete Mix Design. Conducted mix proportioning for beams in lab using UTM, achieving desired compressive strength.

GIS Cut Fill Analysis. Used ArcGIS and Google Earth Pro to calculate earthwork volumes for a proposed road profile.

Final Year Design Project – Performance-Based Seismic Design using BRB.

- Analyzed high-rise RCC buildings with Buckling Restrained Braces (BRBs) under seismic loads.
- Performed nonlinear pushover analysis in ETABS, assessed drift and energy dissipation.
- Demonstrated improved ductility, reduced base shear, and enhanced seismic performance.

AWARDS ACHIEVEMENTS

- NEDAC Merit Scholarship recipient.
- Ranked among top 20 students in intermediate; eligible for full CA scholarship.

LANGUAGES

- English (Fluent), Chinese (Basic), Urdu (Fluent), Pashto (Native)
