ABOUT

Civil Engineer with a strong commitment to sustainable, efficient, and practical engineering solutions. Proficient in problem-solving and contributing to collaborative, results-driven environments. Eager to embrace innovation and continuously adapt to evolving industry standards. Dedicated to adding value through thoughtful planning and execution of impactful projects.

EDUCATION

NED UNIVERSITY OF ENGINEERING AND TECHNOLOGY - Karachi, Pakistan

2021-2025

Bachelor of Civil Engineering

CGPA: 3.18

GOVT DEHLI INTER SCIENCE COLLEGE - Karachi, Pakistan

2019- 2021

Fsc - Pre Engineering

Percentage: 75%

THE EDUCATORS - Karachi, Pakistan

2017- 2019

Matriculation - Science

Percentage: 82%

FINAL YEAR PROJECT

Stress Corrosion Cracking Of Astm A615 Steel Bars Exposed To Natural And Simulated Environment

2024-2025

- This project investigates that how reinforced concrete and bare bars is affected by stress and uniform corrosion under both natural and simulated conditions. Environments like Karachi where Co2 levels are high, can significantly impact steel bars and reinforced concrete by carbonation and corrosion. The study aimed to understand long-term structural behavior for improved material performance in aggressive environments

INDUSTRIAL EXPERIENCE

EXPONENT ENGINEERS PVT LTD – Civil and structure consultant

Intern Engineer: (4-week internship)

- Worked on the design and analysis of steel towers, gaining practical knowledge of structural behavior and load calculations.
- Assisted in preparing and reviewing technical drawings and detailed plans for tower components using industry standard software.
- Learned and applied specialized tower design software for modeling, structural checks, and detailing
- Participated in drawing verification and design documentation, ensuring accuracy and compliance with engineering standards

LOYA ASSOCIATES – Civil and structure consultant

Intern Engineer: (2-week internship)

- Worked on the design and analysis of retaining wall, including stability analysis and soil-structure interaction.
- Supported the development of structural drawings and reinforcement layouts for different wall types.
- Used engineering software to simulate loading conditions and assess wall performance
- Reviewed design outputs for accuracy and aligned them with relevant codes and standards.

TECHNICAL INVOLVEMENTS AND EVENTS

AMERICAN CONCRETE INSTITUTE (ACI) NEDUET STUDENT CHAPTER

Member of Team Logistics and Management

2024- 2025

- Contributed to the planning and execution of technical events such as BeadBox and Flexstasy.

14th INTERNATIONAL CIVIL ENGINEERING CONFERENCE (ICEC)

- Participated in conference support activities including logistics, attendee coordination, and session assistance

SKILLS

- AutoCAD, Revit, ETABs, Grasp, Python, MS Office, Primavera, QGIS

HOBBIES

- Cricket, Travelling, Exercise. Photography
