

Arslan Nadeem

Civil Engineer

Motivated and detail-oriented civil engineering student at the **FAST-NUCES, Lahore**, graduating in 2025. I have a strong foundation in structural analysis, construction management, cost estimation, and infrastructure planning. Hands-on experience with quantity takeoffs and cost estimates has enhanced my understanding of BOQs, material costing, and budgeting. Proficient in **Revit**, **PTV Vissim**, and **Primavera P6**, I bring technical skills in building design, traffic simulation, and project scheduling. I am committed to delivering quality outcomes and contributing effectively in collaborative environments.

House No. 26, Block E-4, Engineers Town,
Lahore, Punjab, Pakistan

CORE SKILLS

- Project Management
- Quantity Estimation
- Engineering Management
- Staff Leadership & Training
- Quality Control & Assurance
- Microsoft Office

TECHNICAL SKILLS

- Revit
- Primavera P6
- PTV Vissim
- AutoCAD (Civil) 2021

WORKSHOPS

- Workshop on Blue Beam Software arranged by ICE.
- Workshop on Primavera P6 Software arranged by ASCE.
- Lecture delivered by PROF. IKUO TOWHATA related to NATURAL DISASTERS.

INTERNSHIPS

Design Intern – *Engineering Project Development Consultants (Pvt) Ltd., Lahore*
July–August 2024

- Assisted in designing a **Pedestrian bridge** at Thokar Niaz Baig Junction to address urgent pedestrian safety needs.
- Supported structural layout planning and performed analysis using **SAP2000**.

ACADEMIC CAREER

B.Sc. (CIVIL ENGINEERING) National University of Computer and Emerging Sciences (**NUCES**)
(2021 - 2025)

F.Sc. (Pre-engineering) Unique Group of Institutions (**UGI**)
(2019 – 2021) **Lahore, Pakistan**

Matriculation (Science) Unique Group of Institutions (**UGI**)
(2017 - 2019) **Lahore, Pakistan**

PROJECTS

FINAL YEAR PROJECT:

- Conducted a comprehensive study on the **Impact of indirect right turns on an Urban Signalized Junction**.
- Simulated pre- and post-implementation scenarios using **PTV Vissim**, and analyzed field data to assess traffic performance and recommend improvements in intersection design and management

ACADEMIC PROJECTS:

- Scheduled a 25-story building in **Primavera P6** with real-world data and complete cost estimation
- Designed residential buildings in **AutoCAD** and **Revit**, incorporating green building concepts
